

AVILO STIKSTOF & PERSLUCHTSYSTEMEN

Produce your own nitrogen on-site

High quality nitrogen in any purity

The right quality of compressed air in your process

From configuration to installation & maintenance

MEET AVILO

Avilo, part of Interfilter Group, was founded in 2001 and has since developed itself as the Dutch market leader when it comes to nitrogen generators. Not just nitrogen, because Avilo configures, produces, installs and maintains high-quality nitrogen generators, compressed air systems and laboratory gas generators. Both standard products and custom-made systems are successfully used worldwide in various markets.

MISSION & VISION

For every situation where compressed air or nitrogen is required, Avilo offers a tailor-made solution. Every employee strives for perfect performance and together the team does everything possible for the ultimate customer experience and sustainability when it comes to the products and services it delivers. And that is why we stand for "Promise a lot. Deliver more.". With this vision, we have now grown into a leading producer and supplier on the market.

ABOUT US

Partnership with Avilo

In-house **production** (OEM) and **custom-made systems**

Parker distributor and **Authorised Repair Center** in the Benelux

Installation, maintenance and **breakdown service** in the Benelux

Fast delivery with **very short delivery times** and **large stock** in the Netherlands

Intensive partnership and your **all-round partner**

COMPRESSED AIR & GAS TREATMENT

Authorised Parker Distributor & Repair Center

As a Compressed Air & Gas Treatment Distributor we supply a wide range of compressed air & gas treatment products. For example filters, dryers, coolers and (lab) gas generators.

We supply these products from brands such as Parker Domnick Hunter, Parker Hiross and Parker Zander.

As a partner of Alup, among others, we supply the compressors for your installation, which we can complete with piping.

Own brand: Avilo gas generators

We also manufacture our own nitrogen generators, built from Parker components. With our own nitrogen generators we offer a safe and cost-efficient alternative to the expensive supply of gas bottles.

Because we are a stock-holding supplier with our own production department, we can assure you of very short delivery times and fast response in all cases.

Laboratories

Food & Beverage

Oil, Gas, Chemistry

OUR METHOD

Analyze

To start, we map out your entire situation and look at your needs in order to engineer the best system.

Configure

Thanks to our own engineering and production, we can fully adapt compressed air and/or gas systems to your specific situation.

Install

We deliver your complete installation turn-key and put it into operation with short delivery times.

Maintain

We also offer maintenance contracts to maintain your installation or retrofit existing installations.

MEMBRANE GAS GENERATORS

Description: Generate high quality nitrogen up to 99.60% purity

PSA GASGENERATOR

Description: Generate ultra-pure nitrogen up to 99.9995% purity

TIRE FILLING SYSTEMS

Description: TyreGas fully automatic tire inflation systems

NITROGEN MEMBRANES

Description: Generate nitrogen with Parker HiFluxx and SmartFluxx

OXYGEN MEMBRANES

Description: Generate up to 40% oxygen enriched air with Parker membranes

FLOW CONTROLLERS

Description: Maintain the correct constant flow of oxygen or nitrogen

NITROGEN GENERATORS

Description: Nitrogen generators specially designed for laboratories

HYDROGEN GENERATORS

Description: Parker Hydrogen Generators for Laboratories

ZERO AIR GENERATORS

Description: Produce Zero Air with Parker generators

CO2 FREE & CLEAN AIR

Description: Produce clean, dry and CO2 free air for laboratory applications

CUSTOM SYSTEM INTEGRATION

Description: We design customized solutions for your application

TURN KEY SYSTEMEN

Description: Complete plug-and-play installations in e.g. a container

OIL-LUBRICATED COMPRESSORS

Description: Producing compressed air with Alup screw compressors

OIL-FREE COMPRESSORS

Description: Producing compressed air with scroll and piston compressors

CONDENSATE TREATMENT

Description: For the correct cleaning and drainage of condensate

FILTER ELEMENTS

Description: Compressed air filters from Parker Zander, Domnick Hunter, Balston and Hiross

FILTER HOUSINGS

Description: Parker filter housings certified for operation

FILTRATION SETS

Description: Ready-to-use sets for the correct compressed air quality

ACTIVE CARBON ADSORBERS

Description: For the removal of oil vapours from compressed air

ADSORPTION DRYERS

Description: Drying compressed air with Parker dryers

REFRIGERATION DRYERS

Description: Drying compressed air with the refrigeration dryers from Alup and Parker

MEMBRANE DRYERS

Description: Compact design dryers to dry compressed air

PRESSURE VESSELS

Description: Various volumes, for the storage of your compressed air and nitrogen

PIPING SYSTEMS

Description: Piping for compressed air and nitrogen applications
